

4-3-5 Ideation Method for Control-Corporeality Framework

Instructions for Quadrant Handout:

- **Initiate:** You will start with a handout specific to one of the Control-Corporeality Framework quadrants. The two arrows are layer 1, and the blue gradient is layer 2, indicating the possible "Genre" of user experience that systems in this quadrant can facilitate.
- **Create:** Spend 5 minutes independently jotting down ideas for systems that embody the characteristics of Layer 1 and Layer 2 of your quadrant.
- **Exchange & Expand:** Pass your handout to the next team member. Take another 5 minutes to review their ideas and either build upon them or add new ideas.
- **Continue:** Keep the rotation going until each member has contributed to the ideation for all four quadrants.
- **Collate & Choose:** After everyone has contributed to each quadrant, come together as a team to consolidate the ideas that stand out for its potential to advance the user experience in each quadrant.

TEAM

IDEA CREATION CANVAS

(LAYER 1 & LAYER 2)

QUADRANT 1

Multiple humans
(inter)

Because there are
multiple humans -
could they all have
High level of human
control at the same time?

Example 1

Ultra sound
+ control - ?

Doctor → Pregnant person → baby
Machine

- > Doctor controls device and process
- > pregnant gives away some control a permission & plays along

Questions

- is control in this
case about "controlling" a
device?

- shared bodily control
→ multiple

Ritual process → devices → output
body movement knowledge
"view"

"Control as mutual consent"

slowing re-habilitation
Ultra training

Other ideas

> Remote
over a distance

inter-~~st~~ bodily
shared
control.

> M-person

> placement of technology
modalities of tech
distributed across
humans. Visual - P1
Tactile - P2

What is to share?

Acceptance of sharing
exchange
process
Role play performative

SWARM robotics but
with humans.
Ad-hoc communications, provided
by the system.

strategy

Inter-corporeal
interactions

QUADRANT 2

IDEA CREATION CANVAS

(LAYER 1 & LAYER 2)

Inter-corporeal
interactions

Ex1.

Ex2.

An army of rescue personal with exoskeletons which are partially controlled by AI and allow collaboration and communication.

AI/compute
at global mission level
at local-bodily control
Compensation with machinery
- other human

How can we use ~~this~~ Ex2
as driving force? Why we ----
Human extend.

Cyborgs collaboration

Ex3.

A virtual game of AI bots but each bot's target or motive is controlled by a human.

AI/compute controls "virtual world"
factors affecting "bodies"
as (drones/machine)
Human controller is

AI → Humans → drones
shared/inter/swarm exp.

High-level of
computer control

QUADRANT 3

IDEA CREATION CANVAS

(LAYER 1 & LAYER 2)

Intra-corporeal
interactions

A personalized assistance like
JARVIS from Ironman.

Jarvis plays as
Servant

1. synchronous physiological
control

sharing the experience on
rehabilitation.

emotional sharing

Experiencing risky scenarios
from the safety of our ~~home~~
with VR and AI which
provide feedback for our actions

Increased awareness
where the device responds
~~to~~ to their ~~env~~
environment and brings
our attention → high
comp control. (Guidance,

tion

High-level of
computer control

2. sharing haptic feedback

Provide superhuman strength
to carry out tiring tasks.
(by exoskeleton)

Computer as contextually
> aware "complementary" ~~des~~
"Responsive" is this high
level of comp
control?

3. sharing eye sight.

extend

Real life heads up display
