

Balancing players across teams and within teams

Across teams
- Create handicaps
- Create ~~advantages~~ advantages

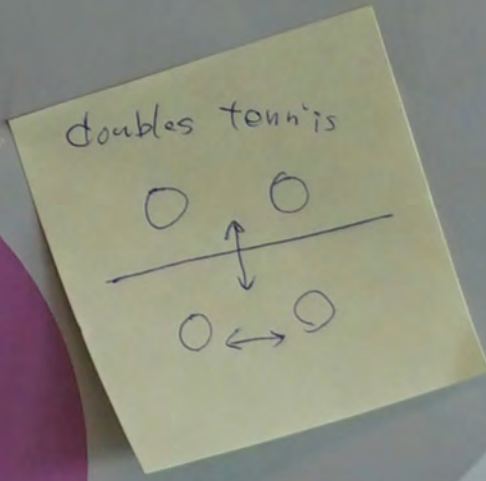

Challenge
Generate advantages
Generate disadvantages

Consider
"intra" team balance &
"inter" team balance
at the same time?

Team Sports, Sport field
Think soccer, football, perhaps volleyball

2 ways of balancing
1 Handicap one team
2 Empower one team

It can be said
Handicap
One team member

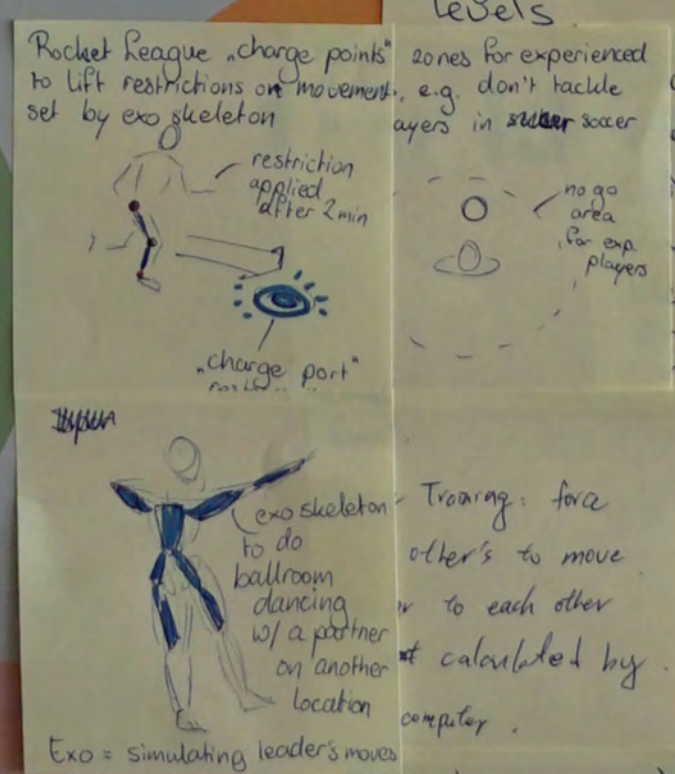

What?

- What is the purpose of this system?
- What needs does it address?
- What are the core functions and features?

Where?

- Where will this system be used?
- Where do users interact with the system most?
- Where can this system integrate into users' lives?

Use digital technologies to level the playing field and make competition fairer between players of different skill levels

ance existing
with digital
technology e.g.
VR, AR, haptics, power-up
superpowers

Training: force
others to move
to each other
calculated by
computer

Exo = simulating leader's moves

Using human aptitudes
to support skill
acquisition, e.g.
trides on a snowboard,
through a javelin

Who?

- Who will use this system?
- Who benefits the most from this system?
- Who are the secondary users or affected parties?

When?

- When is the system used or for what occasions?
- When will the system to provide support or enhancement?
- When does the system remain passive/active?

When teams
will different
levels of expertise
or skills
compete

Dynamic changes
based on fatigue &
game progression

Not to be used
in real
competitions

Can teams play
deliberately worse to
gain advantages?
(What if both
play worse?)

How?

- How does the system work?
- How will users interact with the system?
- How do the body-actuating technologies integrate into the user's experience?

Why?

- Why is this system necessary?
- How should it improve current experiences?
- Why should users choose this system over existing solutions?

Change power balance to
increase entertainment
or for training

Pro-team
- Go back to roots
(Humble)
- Train specific aspect
through handicaps

Restriction
may lead
to appreciation
of skills, once
lifted

For skilled teams
→ Develop new
strategies
Deal with imperfection
Humbleness
Reflection on skills

the power balance system
is not dynamic
while using traditional
method

Analyse power balance
with AI
→ dynamically
adapt power
balance

Restrict field
of competition,
smaller goal,
lower net,
accelerated
ball

Use exoskeleton to strengthen
a weak team
or weaken
a strong team

Should we
hide the existence
of the system?

Competition
needs to
be kept
alive →
engagement
with the
game

Team sport players
which
unbalanced
power

2 teams with large
difference in
proficiency

Differences in level
of individual
players in a team
